

Extreme Low Light Level (EL³) Imaging Multi Spectrum Forensic Imaging

Day to Night and All Weather Capability

ST-2999EMUVR

180nm-1100nm Imaging

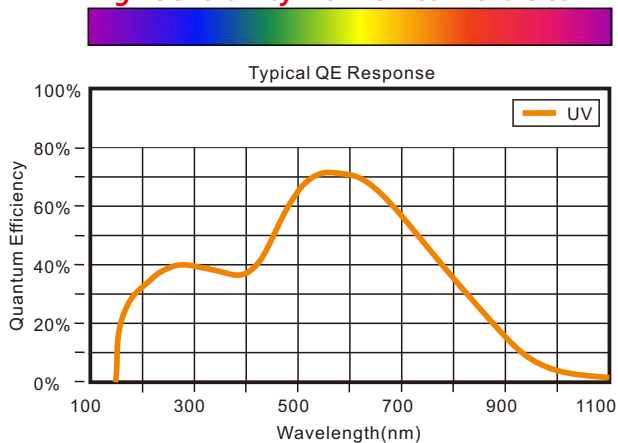

The world's first EL³ camera optimized for ultra-violet response. The high Quantum Efficiency(QE) provides UV sensitivity comparable to expensive, scientific grade CCD cameras.

180nm-1100nm Multi Spectrum Imaging System

The system boasts megapixel and 30fps HDSI digital readout, and 35mm HD Quartz lens with 22 bandpass filters and HD SSD recording.

High Sensitivity from UV to Visible to IR

35mm HD Quartz Lens

The ST-2999EMRUV Forensics realtime fingerprint imaging system takes the fingerprint on the irregular surface easily and fast.
